

The early bird ...

starts working for Testbirds!

Testbirds is a pioneer in the crowd and cloud based testing of apps and web applications. Become part of our team to successfully conquering this rapidly growing international market!

JAVA Development Working Student (m/f/d)

Your Role

- › You are working with our TestChameleon™, part of our Device Cloud, which is a service that enables software testing with virtual machines (VM)
- › You are gaining insights into Cloud-based integration testing
- › You can get hands-on experience with a heterogeneous Cloud
- › You can learn how to automate complex tests or setup scenarios
- › You work agile and are part of our Scrum Team

You Bring

- › You study computer science or a related field for at least a year
- › You are willing to do an internship before you start your working student job to have a proper onboarding (min. 2-4 weeks)
- › You have first experiences in Java programming
- › You have a hands-on mentality and love bringing ideas to life

You get extra points if:

- › You are eager to see new technologies
- › You are interested in automated testing and cloud technologies
- › You have experience with Spring Boot

We are offering

- › A challenging working student job in an international working environment based in the heart of Munich near the Theresienwiese
- › Flat hierarchy: you are responsible for your work and you can implement your own ideas
- › The chance of continued employment (working student, thesis or permanent position)
- › An open culture, uncomplicated togetherness and joy of shared successes
- › A great working atmosphere with a lot of team activities, foosball tournaments, weekly breakfasts and all the coffee/soft drinks you can drink

Are you convinced to become our next Bird?

If yes, please use our application form to submit your current CV, as well as certificates/samples of your work. Don't forget to include your salary expectations and your earliest start date. Your contact person is Stefanie (jobs@testbirds.de).
